

5/8 HP SUBMERSIBLE WATER PUMP

MODEL: SP-750TD

WORKSHOP SERIES

FEATURES

- **Compact submersible pump** that will drain standing water from any environments such as flooded basements and swimming pools.
- **5/8 HP Electric motor** uses copper windings to make it highly efficient drawing only 7.0 amps.
- **Continuous duty motor** can be left running for extended periods of time. The float will switch it off when the water level drops too low.
- **Draws water** from the bottom of the pump to maximize its removal.
- **Stainless steel shell** resists impacts and lowers weight.
- **Power cord** is extra long measuring 26 feet allowing the pump to be submersed to its maximum depth without the need for extra cords.
