

**BUSH HOG®**

# Heavy Duty Hog Zero-Turn Mowers

Performance You Can Count On™

HDE SERIES | HDC SERIES | HDZ SERIES

# FEATURES

HydroGear transaxles provide proven power and long lasting service

Electronic control module offers keyless start, system monitoring and Soft Start PTO engagement to protect drive train components, USB power port

Rotary height-of-cut adjuster on HDC/HDZ models with transport lock, pin out height selection on HDE models

Rubber discharge chute withstands contact with obstacles and snaps back into place

Robot welded, 7GA steel (the same steel used on Bush Hog's heavy duty flex-wing cutters!) cutting deck weldments in cutting widths ranging from 49" to 73" depending on the series

## ADDITIONAL FEATURES AND ACCESSORIES

LED LIGHTS (standard on HDZ, optional on HDC)

CANOPY

GRASS COLLECTION SYSTEM

MULCHING KITS

SEAT PLATFORM ISOLATOR KIT FOR USE WITH NON-SUSPENSION MODELS (HDE/HDC models)

LED light kit (HDC models)

ELECTRIC ACTUATOR KIT (HDZ models)

Deluxe high back, full suspension seat (standard on the HDZ series and optional on the HDE/HDC series) with operator weight adjustment, flip up armrests, and seatbelt. Seat platform on isolators standard on the HDZ models.

Tracking adjustment provides on the fly ability to "tune in" steering handles so unit tracks perfectly, no tools required

## Built To Last.

Spark arrester standard on all models, units approved for use on US Forest Service lands

3" diameter round tube ROPS

9 gal under the seat fuel tank for improved weight distribution, lower center of gravity, and improved ride

Injection molded fenders with reinforcing ribs; molded in beverage holder and storage tray

Rear bumper to protect the engine when backing up

Large 23" x 10.5" (HDE/HDC) or 24" x 12" (HDZ) drive tires in either turf or bar tread

13" x 6.5-6" 4-ply tubeless front caster tires

- Anti-Vibration Isolators
- HG-5400 Transaxles
- 24 x 12-12 Drive Tires
- Engine choices up to 33HP

## 50 Years of Lawn Mowing Innovation

1968

Our first line of garden tractors are released. These tractors were the forerunner and pioneer of our modern lawn mower line.

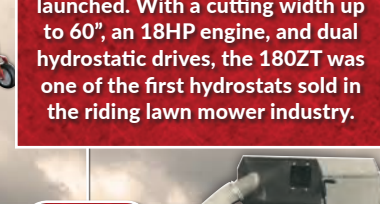

1970

The tradition of innovation behind the Flex-Wing Model 315's quick cutting height adjustment has inspired the development of the rotary height adjustment (RHA) feature on our ZT lines.

1980

One of our first finishing mower series, the TM5 and TM6, is introduced. The same technology that allowed the TM models to "float" over uneven terrain is used in our modern ZT lines.

1989

The front-mounted 180ZT is launched. With a cutting width up to 60", an 18HP engine, and dual hydrostatic drives, the 180ZT was one of the first hydrostats sold in the riding lawn mower industry.

1994-96

The ZT 1800 and 2200 are introduced. These front-mounted mowers were designed for durability, ease-of-use, and maintenance.

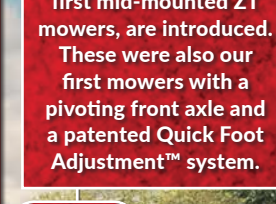

1997

The Turf Champ (TC) line of ZT mowers is launched. The durable steel and multiple cutting widths introduced with the TC series are features that are still used on our ZTs.

1998-99

The ZT 18, 22, and 25 front-mounted models are introduced. The focus on controls and maintenance featured in these models is integral in our modern ZTs.

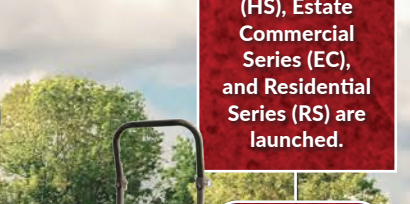

2000

The M Series, our first mid-mounted ZT mowers, are introduced. These were also our first mowers with a pivoting front axle and a patented Quick Foot Adjustment™ system.

2004-05

The Estate Series (ES), Professional Series (PZ), and Commercial Series (CZ) zero turn mowers are introduced.

2008-12

The Home Series (HS), Estate Commercial Series (EC), and Residential Series (RS) are launched.

2017

The Heavy Duty (HD) Hog line of ZT mowers is launched.

2018

Our upgraded HD models with patent-pending features are released.
