

Sweeps five times faster than with a broom: the convenient S 650 makes it possible – and is easy on your back. The sturdy, corrosion-resistant sweeper has a total sweeping width of 25,6 inches and features a powerful roller brush and two side brushes. The device is ideal for areas of 430 ft<sup>2</sup> or larger. The machine draws the waste directly into the 4,2-gallon waste container and delivers outstanding cleaning results. The robust sweeper is extremely easy to manoeuvre. The extra long bristles on the side brushes ensure thorough cleaning right up to the edges. The height-adjustable push handle with two height positions and thermo handle can be adjusted to the height of the individual operator and completely folded down if necessary for compact, upright storage. The sweeping container can be easily removed and safely set down and emptied without coming into contact with the dirt.
