

9510 FERTILIZER GRAIN DRILL

(9510-20 shown with optional equipment)

The Sunflower Model 9510 grain drill is equipped with large, divided hoppers carrying 2.4 bu. (85 L) of seed and 120 lbs. (54 kg.) of dry fertilizer per foot (0.3 m.). The divided hoppers keep the seed and fertilizer protected from the elements and are easily converted to an all-seed mode. This conversion, accomplished without tools, enables the hoppers to carry 3.75 bu. (132 L) of seed per foot (per 0.3 m.). Combining this unique seed / fertilizer hopper with the Sunflower multi-purpose opener produces an exceptionally versatile seeding system. Whether your need is no-till, min-till or conventional seeding with or without fertilizer this drill can do it all.

**Dual Role**

Divided hopper holds 2.4 bu. per foot of seed and 120 lbs. per foot of dry fertilizer.

**Convertible Hoppers**

No tools are needed to convert the hoppers to all-seed with 3.75 bushel per foot capacity.

**Single Shoot Delivery**

Seed and fertilizer combine in a single shoot delivery system to the "Heads Up" opener.

**Simplicity**

Fast and easy fertilizer rate and drive adjustments.

9510 GRAIN DRILL FEATURES

All-Purpose Opener
"Heads Up" opener provides no-till, min-till or conventional seeding.

Heavy Frames
7" x 7" x 3/8" main tube is joined after every fourth opener to the 3" x 5" x 3/8" opener frame.

Wide Walk boards
Ladders fold flat and boards lock automatically when lifted to the storage position.

Optional
Transport pull hitch (TPH) converts 3-point drills to pull type.
