

# ALR3004

The ALR3004 precision pneumatic applicator is built to be installed on 15 to 40 ft no-till drill for soybean, wheat and all other small seed. It have a capacity of 5 tons of dry fertilizer or 4 tons of seeds (160 bu. / 5600 L).

## MAIN ADVANTAGES

- It can combine granular fertilizer and seed on the go.
- It offers a choice of [5 different configurations](#) to apply granular fertilizer and seed.
- Capacity up to 5 tons of fertilizer and 4 tons of seeds (160 bu. / 5600 L)
- Accurate calibration with low pressure seed placement.
- Installation on all brands of no-till drill.

# ALR3004

## Specifications

- **Steel hopper (160 bu. / 5600 L) with rollover tarp**
- **Install directly on the drill frame.**
- **Stainless steel air distribution system from 24 to 32 outlets.**
- **Seed and fertilizer splitter unit (pressure divider too)**
- **Contact wheel for metering drive**
- **Mechanical drive system with variable metering adjustment**
- **Manual shutoff for drill sections**
- **Blower driven by hydraulics**
- **Blower operate by :**
  - **Use of the tractor hydraulics**
  - **Use of a PTO pump kit with 17gpm pump, 4 gal reservoir and oil cooler**
- **Other options offered (See EQUIPMENTS):**
  - **Stainless Steel hopper**
  - **Hydraulic section shutoff with electric controller**
  - **Electronic scale**
  - **Second compartment in the hopper**
  - **Digital acreage monitor**
  - **Transfer auger**
  - **25', 30' or 40' AULARI no-till markers**
  - **Other hydraulic options available on demand**
