

ALR2103AM

The ALR2103AM pneumatic precision applicator can position the fertilizer with high accuracy. It can hook up an air-drill or 6 or 8 single or dual row planter. The very accurate pneumatic spreader incorporates fertilizer using a single disk opener providing a high quality work both at the planting time until later during the growing season.

ALL IN ONE Machine

Five different configurations

- *Planter 6 to 8 rows*
- *Air-drill 10 to 20 feet*
- *Side-dressing applications with 7 to 9 discs*
- *Spreading air-boom up to 40 feet*
- *Application with Zone-till equipment or inter crop cultivator*

The ALR2103AM applicator can also blow fertilizer into a 30 to 40 feet air-boom providing high accuracy spreading over the entire working surfaces. The deflectors on the air-boom are positioned 30 to 40 inches to meet crop needs, but they can be easily moved to meet different needs.

Specifications :

- *4 tons capacity steel hopper with rollover tarp (120 bu. / 4400 L)*
- *Signal and work light kit*
- *Stainless steel air distribution system*
- *Blower drive with 540 or 1000 rpm PTO*
- *Front toolbar with high clearance*
- *Rear 3 point hitch cat III with adjustable height*
- *Options : Many hydraulic options, electronic scale, Stainless steel hopper*
